Summary

Dynamic professional with over 2.2 years of experience in Business Intelligence development, specializing in Qlik Sense. Proven expertise in designing and delivering comprehensive reporting solutions and dashboards across the Health & General Insurance, Finance, and Manufacturing sectors. Skilled in Qlik Sense administration and security customization, with additional experience in Power BI Desktop, Power Query, and Power BI Service. Adept at utilizing AI tools to optimize and automate performance.

Technical Skills

QLIK SENSE | QLIKVIEW| NPRINTING | POWER BI | QMC | STATISTICAL ANALYSIS | SQL | EXCEL | DATA TRANSACTION | SCRIPTING | DATA VISUALIZATION | DATA MODELLING | POWER QUERY | ETL | MYSQL | STATISTICAL ANALYSIS | DAX | DATA ANALYSIS | REPORTING AND DASHBOARDING | DATA CLEANING | AI TOOLS | POWERPOINT PRESENTATION | MACROS

Education

Bachelor of Engineering in Computer Science & Engineering from SRTM University with an 8.58 CGPA in November 2020.

Area Of Exposure

- Having **2 Years of Experience** in Dashboard and report development using **Qlik Sense**.
- Experience in Scripting, and developing end-to-end Dashboards using Qlik Sense and Power BI.
- Skilled in creating Data Modelling, scripting, visualization, and reporting techniques from various sources. Proficient in error handling and debugging of QlikView and Qlik Sense reports.
- Built customized reports using Qlik Nprinting and automation of report generation through Nprinting.
- Manage tasks and schedules on the Nprinting Server.
- Trained end-users to develop a variety of charts, visualizations, and platform functionalities.

Qlik Admin:

- Experienced in Qlik Sense installation, server migration, and maintenance of Qlik Sense Enterprise.
- Proficient in Qlik server setup, security implementation, and admin activities.
- Designed daily refresh processes, managed tasks, user creation, and Dashboard publishing using QMC.

Achievements

- **Successfully installed Qlik Sense and performed server migrations** for the Ghobash Group organization, ensuring seamless transitions without impacting operations.
- Achieved a **100% salary increase** after one year at Iqra Technology by consistently exceeding performance targets and contributing to key projects.

Work Experience

Organization: Iqra Technology (Aurangabad, Maharashtra) **[Link]**   April 2021 - June 2023
Role: Qlik Sense Intern.   April 2021 - May 2021

Role: Business Intelligence (BI) Developer.   (On Contract) June 2021 - June 2023

Client: Ghobash Group [Link]

Description: A UAE-based well-established Cooperate house with more than 10 group companies in Technology, Oil & Gas, Pharmaceuticals, Manufacturing, Distribution, Hospitality, Healthcare, and Consumer Services.

Project I: CNS Service Contract Dashboard - [Qlik Sense | Oracle]

- CNS provides integrated solutions for all customer vertical needs and digital transformations. CNS covers three main pillars of the IT industry: Banking & Financial Service Insurance (BFSI), Technology & Innovation Partner (TIP), and IT Outsourcing services (ITO).
- Implemented an end-to-end Service Contract Dashboard using Qlik Sense, automating contract monitoring and tracking, which improved efficiency and provided real-time updates on 100+ active contracts.

Project II: GCG Inventory Dashboard - [Qlik Sense | Oracle]

- Developed a Qlik Sense dashboard for inventory management, integrating data to provide insights on stock levels, inventory value, and transactions, enhancing inventory accuracy.
- Enabled precise monitoring of stock levels and inventory values by brand, item, and region, facilitating informed decision-making for managers and executives.

Project III: Migration of Dashboard - [QlikView |Qlik Sene | Oracle]

- Migrated 2 dashboards from QlikView to Qlik Sense, enhancing performance and insights for 8 users.
- Executed data cleaning and transformation, built a data model, created an insightful dashboard on Qlik Sense Enterprise, and reconciled the data.

Responsibilities:

- Gathering the requirements from the client.
- Analyzing business needs and use cases to customize Qlik Sense functionality for optimal customer analytics reporting.
- Collaborated closely with business users, conducting daily calls/e-mails to translate end-user requirements into efficient dashboards.
- Extracted, transformed, and cleaned data from diverse sources, ensuring accuracy and robust model development.
- Customized visualizations to precisely represent client-specific data and scheduled data extractors for regular updates.
- Worked on Qlik NPrinting to design customized reports (Excel/PDF/PowerPoint/Word) for end users.
- **Qlik Admin:** Worked on installing and configuring Qlik Sense Enterprise on Windows Server, configuring QMC, and improving data accessibility for 40+ users using QMC.

Professional Development & Learning   June 2023 - Present
Qlik Sense Community Achievements: **Qlik Community profile [Link]**

- **Qlik Community Expertise: Authored over 17 solutions** within two weeks, earning recognition as a valuable contributor and demonstrating rapid problem-solving capabilities. This achievement places me among the **top 1,034 members** known for their substantial knowledge and leadership in the Qlik user community.
- **Community Recognition:** — **Obtained 21+ badges** reflecting a wide range of contributions and consistent engagement, showcasing my commitment to sharing expertise.
- Engaged in continuous learning and professional development.
- Completed **specialized courses** in Business Intelligence using **Power BI**, and advanced Microsoft Excel.   August – 2024

Projects
